

Conclusions of the Commission on Dr. Arūnas Bubnys's work "**Holocaust in the Provinces of Lithuania in 1941**"

The subcommission acknowledges Dr. Arūnas Bubnys's work "**The Holocaust in the Provinces of Lithuania in 1941**" as an important contribution in researching the process, features and consequences of the Holocaust in Lithuania. Six districts were chosen as representative of the various regions of Lithuania. The work is mostly based on the documents of two Lithuanian archives: the Lithuanian Central State Archive and the Lithuanian Special Archive.

This work is a part of the investigation of the Commission intended to fully and objectively disclose the organisers, participants and perpetrators of the Holocaust in Lithuania. The process of the genocide has been shown to consist of two relatively different periods.

The factual documentation of the investigation is accepted, whereas the conclusions will be drafted and approved after carrying out a comprehensive investigation of the mass killings of Lithuanian Jews "The Organised Annihilation of Jews in Lithuania".
